Internet Solution for your business

INTERNET LEASE LINE

In this fast paced world, every business aspires to be well - connected, noticeable and competent, regardless of their location, size or type. Fusionnet understands the need of your business and thus helps it advance ahead with an unfair edge of technology.

A boon for the business world – Fusionnet 's amazing services, add a superior technological edge to your business by helping it maintain an ultra-fast data output at low latency, thereby ensuring a successful stream of data transfer, and thus contributing to a better communication. We provide dedicated Leased line connectivity for SME & Enterprise segment on fiber ring topology and wire less media.

WHY FUSIONNET

Dedicated Bandwidth

Never apologize for an interrupted conference call again! Our services let your business enjoy seamless bandwidth connection that will allow for increased productivity with high-speed internet that will serve to eliminate redundant company costs by replicating data more frequently and restoring it faster at the same speed, regardless of how many employees are sharing the connection.

Reliability

We assure data transfer of the highest quality and is open to customizing solutions to meet the varied needs of your business venture. Fusionnet is a brand known to offer unparalleled technical and operational reliability by providing sole ownership of the bandwidth and a higher sense of control to our valued customers.

High Speed

We're all in a hurry and for good reason, Time is money. Fusionnet's high-speed broadband plans will always keep you one step ahead in your business.

Choice of Effective & Budgetary Plans

Fusionnet serves to fulfill specific needs of your business by providing custom-made plans and support services. Choose from among a list of unmatched and reliable broadband schemes engineered to meet your networking and operational needs on a cost-effective budget.

State of the art Technology

Fusionnet perfects internet solutions with an innovative edge to help you experience state-of-the-art technology that will optimize efficiency and staff productivity. Choose from among upgraded & upbeat plans for your everyday business functioning and networking.

No Data Caps

We constantly strive to pioneer solutions powered by the latest technologies to give you a 365-degree internet experience. Fusionnet's unlimited plans are super saver options as the speed remains consistent throughout the subscription period. Our committed bandwidth lets you enjoy uninterrupted hours of unlimited data with zero downtime.

Lightning Fast Uploads and Downloads

Fusionnet's symmetrical bandwidth plan lets you process uploads and/or downloads at transcendence levels of speed and competency, encouraging your staff to deliver results that par managerial expectations.

99.5 % SLA (Service level agreement)

We are at your service 24 hours a day, 7 days a week and 365 days a year, committed to monitoring and resolving issues as soon as we receive them and within the promised hours.

24x7 Proactive Monitoring and NOC Support

Our team keeps an updated stat of your data plan so as to resolve any concurrent issue on time. In the case of any troubleshooting, you can reach out to our dedicated online support to help resolve them.

Reduced Downtime

Downtime relates to the internet slowing down due to increased downloads and/or uploads. In case you experience any outage, contacting our dedicated service team will have you back on track in no time.

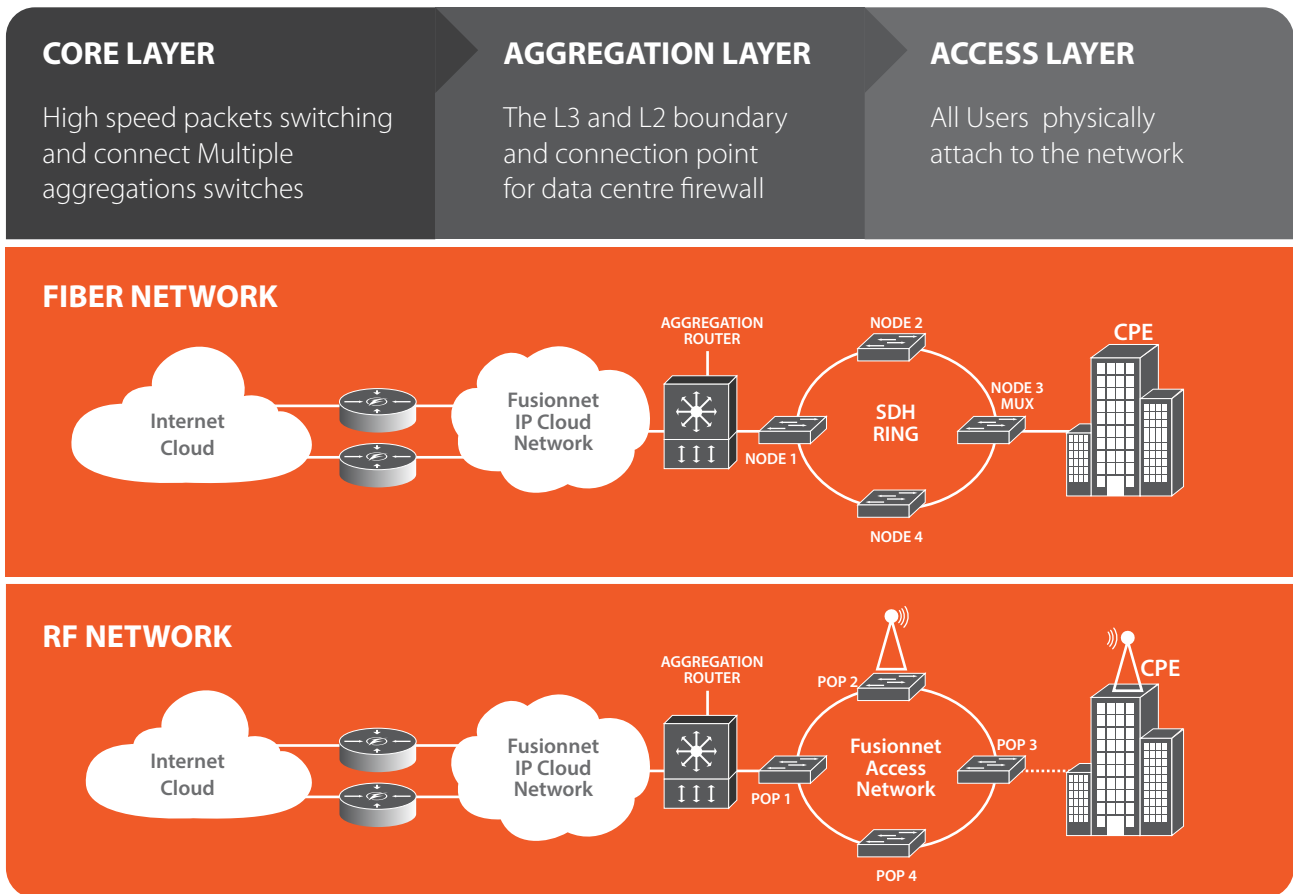

OUR TECHNOLOGY

A key design decision was to centralize the network as much as possible at Fusionnet's operations centre, allowing it to leverage economies of scale while minimizing the network's footprint and complexity at its points-of-presence (POPs).

Fusionnet can leverage Juniper Networks' Virtual Chassis technology, supported by High End MX

series routers, EX series switches and SRX firewalls in its core network.

Fusionnet networking design is based on a three-layer network design model with core, aggregation, and access layers. Each layer has specific requirements and provides different features and functionality.
